# Reflect your personality, not your disability!

Here at Coolcrutches, we understand how hard it is to have to walk on crutches, whether for a broken leg or a permanently disabling condition. Under-arm and NHS crutches give you sore hands, click, make you look and feel disabled.....and they're grey!

We decided to start coolcrutches to offer another option. Our crutches come in lots of different colours and prints. We can also make them up to your own design (UK/EU only). They have a washable, removable neoprene squidgy grip which moulds to left and right hands and makes walking a lot more comfortable. They are a quality product, robust, solid yet lightweight.

## Details

- Aluminium cane 22mm diameter
- Weight 0.594 kg or 1lb 5 oz
- Maximum user weight 150 kg or 330lbs
- Approved according to UNE EN ISO 11334-1
- Moulded left and right-handed designs
- Arm cuff measure from end to end 16 inches/41cms
- Crutch adjusts to fit a person 5' (1m 52cms) to 6'4" (1m 93cms)
- Crutch at it's shortest measures 89cms or 2'11"(to back of crutch)
- Crutch at it's longest measures 126cms or 4'2"(to back of crutch)
- To adjust the height, pull off the little black clip on the main stem, then pull out the inner tubing to suit your height. The same applies to the clip between the grip and the cuff.
- Crutch separates into 3 parts to fit into a suitcase. Longest part is 78 cms.
- Smallest length between bottom of cuff and handgrip is 5 and three quarter inches (15 cms). Top of the cuff to grip is 7 and three quarter inches (20 cms)
